.....
Future Proofed and Fully Managed

An Industry First

Internet Ready Lodge Homes

Clubwifi now has the ability to work with Designers and Manufacturers to deliver Internet Ready Lodges and Mobile Homes direct from the factory. In principle, a simple “plug and play” solution for the new home users and management free for park owners*.

Our Amazon based controlling servers manage all aspects of internet delivery, including, software updates, security management, NEW OWNER mode set ups, resale set ups and much more, all delivered instantly for ease of use for the new owner.

Internet Connected Smart TV Solutions

With Unifi's In Wall WiFi and Cat 7 Cable high speed connections, all Smart TV's may be connected online for all online content and services.

*We work closely with park owners and architects/planners to ensure high speed internet delivery is available on the requested development.

An Industry First

Internet Ready Lodge Homes

These are just a few of the services that can be enabled with an Internet Ready Smart Home

Service	Lodge Access	Remote Access
IP CCTV - security systems	✓	✓
Internet Music and Video	✓	✓
Internet Films and Streaming	✓	✓
Apple Home Kit & Amazon Alexa Information	✓	✓
Heating & Lighting	✓	✓
WiFi and Internet Access	✓	✓

All of these services are able to be managed by Clubwifi's Servers.

Our aim is to simplify this process by working with manufacturers to install cabling and systems during build. Clubwifi will supply all relevant cabling, equipment and training to ensure a seamless delivery to the client. With the aid of a simple client request list - (this choice list will be available on our website soon) and the relevant equipment will be shipped to integrate into the build process.

For all NEW Manufacturing Partners, we will provide a **FREE** sample kit for demonstration purposes on all NEW Lodge Designs - this enables us to produce relevant equipment packs available for relevant models.

System Example Smart Lodge

Managed Services

How does remote management work?

Clubwifi is able to remotely manage all the installed equipment on a day to day basis. Including all device firmware updates, security updates and device management.

We are also able to change WiFi Broadcast Zones and Identities and completely reset all devices remotely should a lodge be sold to a new owner.

What's next?

If this is of interest and you wish to arrange a meeting to discuss in detail, then please give us a call.

We would be happy to discuss, plan and design solutions for customers with you.

These solutions are bespoke and subject to internet being available on the chosen site for install. For park owners - we are able to supply High Speed Fibre/Cat7 networks for NEW developments - please contact us for more details on these ground based services.
