An Industry First
Internet Ready Pitches for New Park Developments

Clubwifi is working with Designers and Manufacturers to deliver Internet Ready Lodges and Mobile Homes direct from the factory. In principle, a simple "plug and play" solution for the new home users and management free for park owners.

We now have a solution to provide park Architects and Designers with the network plans to implement HIGH SPEED Fibre/CAT7 networks and security systems ready for Internet "Plug and Play" ready pitches.

Example **New** Development

Main High Speed Internet feed

Main Switch and Network Security Cabinet

Optional CCTV Controllers

Secondary Network Feed Cabinet

CAT7 or FIBRE underground site connections

The demand for internet usage on Holiday Parks is now at a premium. To continue to deliver HIGH SPEED solutions for data streaming, multicasting and secure networks, we now have solutions for NEW park builds which are designed specifically for HIGH SPEED internet delivery to end users.

All of these networks are managed by Clubwifi and deliver even more service to the end users than current WiFi solutions.

High Speed Data Networks
Internet Ready Pitches for New Lodge Homes

These are just a few of the services that are available to the Park Owner

Service

IP CCTV - security systems for your park	✓
Firmware and system updates to all network switches and USG's	✓
Clubwifi manages users connections under your instructions	✓
Data management and usage details monthly	✓
Full remote management and support 24/7	✓
Ability to charge for Internet Service to end users	✓

Managed Service for Park Owners

Our aim is to work closely with Park Owners and Architects to deliver a complete bespoke Data Network solution that is pitch ready.
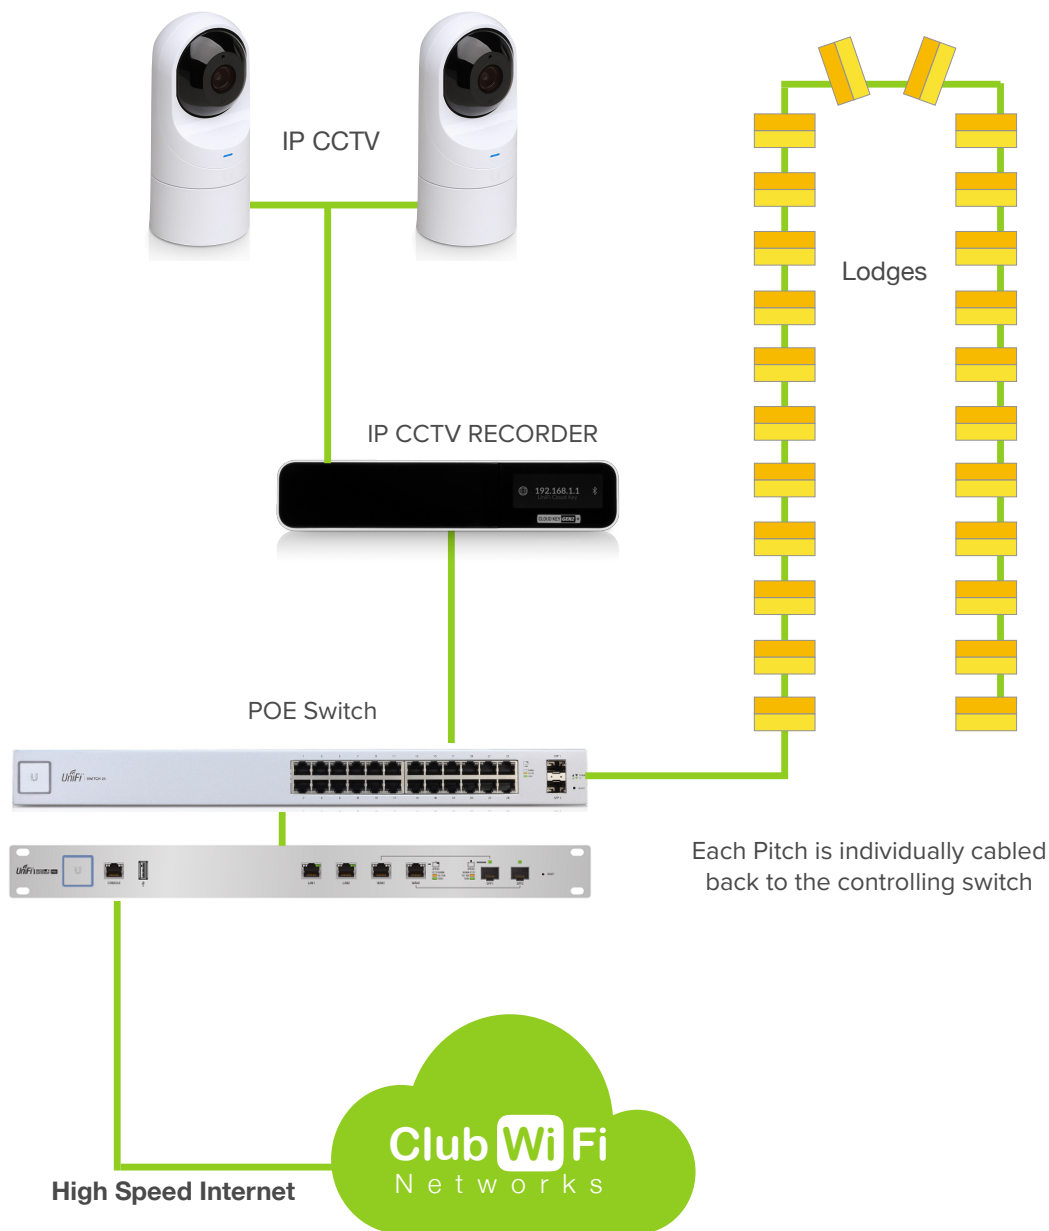

From arranging HIGH SPPED fibre network to site, designing the backbone data network with security and implementing the fully managed service.

Clubwifi will produce all relevant data cabling schematics along with the network topology solutions to ensure total clarity to park owner. There will also be a quotation for the solution detailing all aspects to the installation onsite, from ducting to external data cabinets and power requirements.

Managed Services
How does remote management work?

Clubwifi is able to remotely manage all the installed equipment on a day to day basis. Including all device firmware updates, security updates and device management.

We are also able to change WiFi Broadcast Zones and Identities and completely reset all devices remotely should a lodge be sold to a new owner.

What's next?

If this is of interest and you wish to arrange a meeting to discuss in detail, then please give us a call. We would be happy to discuss, plan and design solutions for customers with you.

These solutions are bespoke and subject to internet being available on the chosen site for install. There is a charge for this service which is refundable should the Park Owner choose Clubwifi to design, install, set and manage this solution.
