Tourism - Marine Industry

Dartmouth, Devon. UK

### Client Requirements

Darthaven Marina wanted to provide a Free to Access System for their Berth Holders and Over night Visitors with the option to purchase additional accounts.

They also needed a Private Network for their Staff to be connected to the Network whilst working around the Marina.

### Business Benefits

The main benefit to having the Unifi UAP Access points, Controllers and Switches provides the business with a superb uptime, with fantastic WiFi across site allows the business to deliver even more for their customers. With access to a Seamless system whilst you are away on holiday/visiting your berth onboard, you are able to catch up on vital weather reports etc. Something that Darthaven wanted include in their Berth Holder Packages.

### Clubwifi Solution

A lot of planning went into the structure of this Network. Ensuring an even signal across the Marina can be tricky due to environmental factors. The initial broadband feed comes into the main Marina office which is then bridged across a railway line to the Harbour Office. This is where the main bridge point is fixed giving an overview to the rest of the network. All controlled and secured with Unifi Switches and Unifi Security Gateway Pro. The system is managed and controlled on the hosted Clubwifi Unifi Controller platform, with regular updates and maintenance ensuring the factory runs smoothly with this technology at all times.

### Client Testimonial

*Darthaven marina is located on the banks of the river Dart. The remote nature of our site not helped by a steam train dissecting the property has always posed problems for our network. Club Wi-Fi did a fresh install just over 2 years ago and there has been a marked increase in signal strength. If we have any problems, the response time and service from Mike and Josh has been first class ably backed up by Heidi and Katy in the office. Kev's not bad either! We have been very happy with Club Wi-fi and are expecting further improvements when we have had our scheduled equipment and system update in 2018.*

**Martin Pragnell- Marina Manager**
